

AI VIDEO FOR PROFESSIONALS

Experience Hollywood filmmakers'
favorite AI Filmmaking tool.

Designed and built in San Francisco, USA.

WWW.MARTINI.FILM

POWERED BY FILMMAKERS' FAVORITE AI MODELS

Veo 3

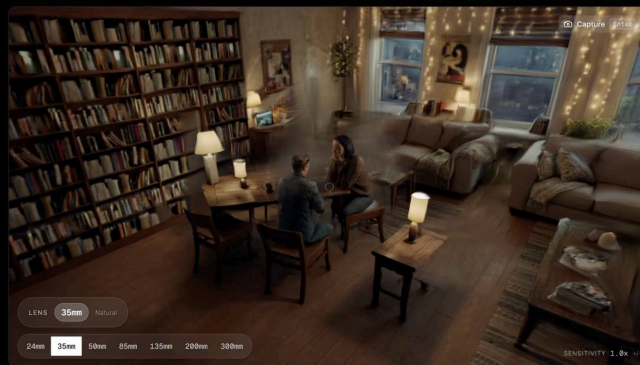

BUILT FOR PROS.

Most AI tools are built around prompts and seeds — not the way filmmakers think. Martini puts you in the director's chair so you can make the video you see in your head.

Camera Control

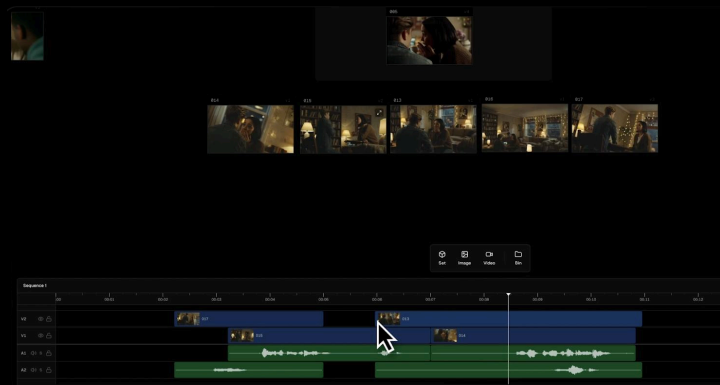

Get the exact shot you want, not whatever the model gives you. Step into virtual worlds and compose shots with camera position, lenses, and movement.

Explore your set

Integrated Pipeline

No more juggling disconnected tools. Image generation, video generation, and world models—all in one place, with a built-in timeline.

Built for Teams

Share prompts, edits, and feedback in real time.

Explore ideas together the way you do in Figma—but for generative film.
